Summary

1 year of experience working with React, Python, AWS services like API Gateway, Lambda and DynamoDB.

By no means a seasoned expert, but someone who is flexible enough to quickly adapt to new frameworks and practices in a short time frame, someone who is not hesitant to put in extra effort to get the job done in an organized and systematic manner.

Personal Information

Date of Birth: 30 Sep 1993 | **Nationality:** Myanmar | **Marital Status:** Single | **Available Date:** 1 month notice

Technical Skills

- React, NodeJS, Python, Java
- AWS Services (API Gateway, Lambda, S3, DynamoDB, etc.)
- Experience in working with RESTful APIs
- Backend development and database administration
- Serverless framework

Work Experience

Software Engineer | Lucence

Jun 2021 - Current

- Develop and maintain frontend applications using React, Mobx and Ant Design.
- Build RESTful APIs (using API Gateway, S3, Lambda, DynamoDB and MySQL) that serves data to the frontend
